The handling of paper claims is more resource-intensive for the CRB than the handling of electronic claims. Each paper claim must be opened, date-stamped, numbered, scanned, and uploaded to eCRB, and details from the paper claim must be entered manually into eCRB to generate an electronic claim.

More critically, acceptance of paper claims creates a dependency on the receipt and processing of mail and courier deliveries. The current disruption at the Library of Congress to both mail processing and acceptance of courier deliveries because of the COVID–19 pandemic demonstrates the risk to claims processing of that dependency.

In order to eliminate the need for resource-intensive manual processing of paper claims and to mitigate the risk to CRB operations of a disruption to normal mail and courier delivery, and having received no comments from the public in response to the May 6, 2020 proposed rule, the Judges hereby amend 37 CFR part 360 to require that all claims be filed online through eCRB.

DEPARTMENT OF VETERANS AFFAIRS

38 CFR Part 21

RIN 2900–AP72

Veterans Employment Pay for Success Grant Program

AGENCY: Department of Veterans Affairs.

ACTION: Final rule.

SUMMARY: The Department of Veterans Affairs (VA) established a grant program (Veterans Employment Pay for Success (VEPFS)) to award grants to eligible entities to fund projects that are successful in accomplishing employment rehabilitation for Veterans with service-connected disabilities. VA will award grants on the basis of an eligible entity’s proposed use of a Pay for Success (PFS) strategy to achieve goals. This final rule adopts with changes an interim final rule that established regulations for awarding a VEPFS grant, including the general process for awarding the grant, criteria and parameters for evaluating grant applications, priorities related to the award of a grant, and general requirements and guidance for administering a VEPFS grant program.

DATES: This rule is effective on June 24, 2020.

FOR FURTHER INFORMATION CONTACT: Mike Frueh, Deputy Assistant Secretary, Planning and Performance Management, (008A), Department of Veterans Affairs, 810 Vermont Ave. NW, Washington, DC, (202) 632–8784. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION: Section 3119 of title 38, United States Code, authorizes the Secretary of Veterans Affairs (Secretary) to make grants to or contract with public or nonprofit agencies, including institutions of higher learning, to advance “the knowledge, methods, techniques, and resources available for use in rehabilitation programs for veterans.” Section 3119 specifically authorizes the Secretary to make grants to such agencies to conduct or provide support for projects which are “designed to increase the resources and potential for accomplishing the rehabilitation of disabled veterans.” (See also implementing regulation at 38 CFR 21.390.)

On August 10, 2016, VA published an interim final rule in the Federal Register, 81 FR 52770, under the authority of sec. 3119 establishing regulations for administering a VEPFS grant program to award grants to eligible entities to fund projects that are successful in accomplishing employment rehabilitation for Veterans with service-connected disabilities. In general, a PFS model is a strategy for successfully attaining positive social or environmental outcomes by paying for an intervention to achieve such outcomes only after the intervention produces these outcomes. The interim final rule included the general process for awarding the grant, criteria and parameters for evaluating grant applications, priorities related to the award of a grant, and general requirements and guidance for administering a VEPFS grant program. VA provided a 60-day public comment period that ended on October 11, 2016, and received nine comments from a single entity.

The first comment recommended amending the definition of “Employment outcome” to include outcomes that occur “during” as well as following the service period so that the PFS agreement reflects the benefits of the selected intervention while services are provided. In addition, this comment and the third comment recommended amending the definitions of “Employment outcome” and “Outcomes payments” to allow a PFS project evaluation to be based on a “comparison” group in addition to a “control” group so there is greater flexibility when structuring valid evaluation methodologies. VA agrees that if employment outcomes can be measured during the service period, an evaluator may be able to obtain useful information that could assist with determining whether employment outcomes have improved across the lifecycle of the project. It is feasible to assume that some outcomes may be achievable and measurable at any point during the lifecycle of the service period. VA believes measuring outcomes during the service period may allow for greater flexibility in transaction structuring for outcomes payments. In addition, VA agrees that basing a project evaluation on a comparison group or a control group will allow for greater flexibility in structuring evaluation methodologies. Having greater flexibility in this regard may allow for greater statistical power when measuring outcomes and benefit the VA program office when evaluating the impact of the outcomes on future rehabilitation policy and programming. Therefore, we are amending the definition of “Employment outcome” to reflect that it means the employment or earnings of a participant in an intervention group or a control or comparison group either during or after a service period. We are further amending this definition and the definition of “Outcomes payments” to indicate that comparison groups, in addition to control groups, may be used when structuring evaluation methodologies.

The second comment proposed adding a definition of “Outcome metrics” and additional comments, including the sixth comment.
