DECLARATION OF JEFFREY S. GRAY, PH.D.

I, Jeffrey S. Gray, Ph.D., declare:

1. I am over eighteen (18) years of age and am employed as President of Analytics Research Group, LLC. I have been retained by the Motion Picture Association, Inc. (“MPA”) to serve as an expert witness in the captioned proceedings. A copy of my curriculum vitae is attached as Exhibit A. I have personal knowledge of the following facts and, if called and sworn as a witness, could and would competently testify thereto.

2. On March 11, 2022, counsel for MPA provided me with a Microsoft Excel file titled “MC Represented Programs (w translations)(REVISED 03.11.22).xlsx.” The file contained a list of 2,187 works for which Multigroup Claimants (“MC”) is seeking royalties within the Program Suppliers categories in these proceedings (“MC-Claimed Titles”). The file included time restrictions for two claimants resulting in 2,180 MC-Claimed Titles in 2015, 2,187 MC-Claimed Titles in 2016, and 2,167 MC-Claimed Titles in 2017.¹ I understand that the file was produced by MC in discovery in these proceedings.

¹ In addition, some of the 2,187 titles listed in MC Represented Programs (w translations)(REVISED 03.11.22).xlsx appear to be duplicates of one another (i.e., where the same work is listed by MC more than one time). My analysis considered these duplicate appearances of the same title as referring to a single work each royalty year. As a result,

3. Counsel for MPA asked me to analyze the file and determine whether the MC-Claimed Titles were distantly retransmitted by cable operators and/or satellite carriers during the 2015-17 royalty years. I performed this analysis by creating a computer algorithm that compared the MC-Claimed Titles with television programming data I acquired data from FYI Television, Inc. (“FYI”), which maintains detailed information for each program which aired on North American broadcast stations for the years 2015-17.

4. Using my computer algorithm, I reviewed FYI programming data for 4,540 broadcast station-year combinations for stations that were distantly retransmitted by cable operators and satellite carriers over the 2015-17 time period,² and compared that data to the MC-Claimed Titles. In order to maximize the number of MC-Claimed Titles that would be considered matches with the FYI data, for purposes of this analysis, I performed title matching between the MC-Claimed Titles and the FYI data after removing punctuations from each data set, correcting for the placement of “The” at the end of a title, and converting foreign titles to English.

5. My analysis found the following with regard to the MC-Claimed Titles:
- a. In 2015, of the 2,180 MC-Claimed Titles, only 242 unique titles aired on broadcast signals that were distantly retransmitted by cable and satellite operators. The remaining 1,938 titles (approximately 89% of the works claimed by MC)

my analysis shows 2,092 unique MC-claimed titles in the Program Suppliers category in 2015; 2,099 in 2016; and 2,079 in 2017.

² A list of the broadcast stations that were included in my analysis of FYI programming data for each of the 2015-17 royalty years is attached hereto as Exhibit B. These 4,540 broadcast stations consisted of 1,362 unique broadcast stations in 2015, 1,541 unique broadcast stations in 2016, and 1,637 unique broadcast stations in 2017.

were duplicate titles or did not appear in the 2015 broadcast station data I analyzed.

- b. Of the 242 titles which aired and were distantly retransmitted in 2015, only 158 titles fall within the Program Suppliers category based on the FYI data. The remaining titles appear to fall in the Canadian Claimants Group, Commercial Television, Devotional, and Public Television categories.
- c. In 2016, of the 2,187 MC-Claimed Titles, only 220 unique titles aired on broadcast signals that were distantly retransmitted by cable and satellite operators. The remaining 1,967 titles (approximately 90% of the works claimed by MC) were duplicate titles or did not appear in the 2016 broadcast station data I analyzed.
- d. Of the 220 titles which aired and were distantly retransmitted in 2016, only 153 titles fall within the Program Suppliers category based on the FYI data. The remaining titles appear to fall in the Canadian Claimants Group, Commercial Television, Devotional, and Public Television categories.
- e. In 2017, of the 2,167 MC-Claimed Titles, only 206 unique titles aired on broadcast signals that were distantly retransmitted by cable and satellite operators. The remaining 1,961 titles (approximately 90% of the works claimed by MC) were duplicate titles or did not appear in the 2017 broadcast station data I analyzed.
- f. Of the 206 titles which aired and were distantly retransmitted by cable or satellite operators in 2017, only 156 titles fall within the Program Suppliers category

based on the FYI data. The remaining titles appear to fall in the Canadian Claimants Group, Commercial Television, Devotional, and Public Television categories.

6. Worksheets showing the results of my analysis for 2015, 2016, and 2017 are attached hereto as Exhibit C.

I declare under penalty of perjury under the laws of the United States of America that the foregoing is true and correct.

Executed this 4th day of May, 2022, at Washington, D.C.
